

Questionnaire for E-Gov Presidential Initiative or Line of Business Standards Selection Process

Background:

Each E-Gov Presidential Initiative and Line of Business (LOB) requires the use of standards for deployment of innovative, web-based information technology (IT) services. Standards are required to ensure the necessary interoperability and security between government agencies, businesses, and citizens. Such standards are generally private sector, consensus-based standards. In cases where no suitable private sector standards are available, USG may develop and adopt government unique standards.

The Office of Management and Budget (OMB) has recognized the need to identify and validate appropriate and effective standards for E-Gov applications to ensure that the most effective standards are used in E-Gov applications and has assigned this responsibility to NIST. The lack of uniform, effective standards can lead to problems in internet accessibility, data compatibility, as well as national security and personal privacy concerns. NIST has established this E-Gov validation process to address such concerns and to assist federal agencies in the selection of appropriate E-Gov standards.
